MSc Finance Analytics graduate who has built AI pipelines that turn raw business data into structured performance reports, reducing manual reporting from hours to minutes. Experienced translating messy datasets into clear insight that senior leaders act on, with hands-on exposure to Python and Microsoft Copilot. Confident working with people at all levels, from department heads to Managing Directors, and resilient under competing deadlines. Seeking a genuine entry-level AI role with real responsibility from day one.

AI AND DATA EXPERIENCE

Agentic AI Workflow Automation

June 2026 – Present

- Built automated AI pipelines using Python, n8n, and LangGraph that transform raw business data into structured performance reports, reducing manual reporting time from hours to minutes
- Explored Microsoft Copilot integration for business reporting workflows, testing how AI tools can improve productivity across routine analytical tasks
- Completed the DeepLearning.AI Agentic AI Certificate covering multi-agent systems and automated tool use, then applied the concepts to build working pipelines

Quantium Data Analytics Simulation (Forage) – Retail Sector

August 2026

- Transformed 264,000+ rows of messy retail performance data into actionable insight via customer segmentation and experimentation design in R and Python
- Identified a measurable uplift in trial store performance using a control-store methodology with statistical confidence intervals, presented in a client-ready report

BUSINESS PERFORMANCE AND STAKEHOLDER EXPERIENCE

Practera Finance Micro Internship, London, UK

June 2026 – July 2026

Student Consultant (Research Lead)

- Acted as central point of contact for a senior Managing Director and 8-person team, building relationships across all levels to influence decisions through evidence-based insight
- Turned a messy \$77B+ dataset into a clear summary of capital flows, proactively identifying a critical strategic issue that redirected the team's approach
- Managed four concurrent workstreams across a 5-week project with no extensions, adapting the analytical approach mid-project after discovering the original strategy was flawed

King's Investment Fund (Team Leader)

March 2026 – June 2026

- Coordinated performance reporting across an 8-member team, building Excel dashboards tracking portfolio productivity, commercial returns, and risk metrics
- Maintained action logs and project trackers driving follow-ups between meetings, ensuring 100% on-time delivery across all reporting deadlines

OPERATIONAL AND TECHNICAL EXPERIENCE

DG Software, Mumbai, India (Internship)

March 2025 – August 2025

- Reduced data discrepancies by 30% by restructuring 12 database tables and embedding improved validation processes
- Built BI reporting dashboards used by senior managers for operational decision-making, turning raw data into insight for non-technical audiences
- Created standardised process documentation enabling two new team members to operate the improved systems independently within their first week

EDUCATION

Kings College London, London, UK

Sep 2025 – Sep 2026

MSc Finance Analytics – Corporate finance, financial reporting, statistical modelling, econometrics

Jai Hind College, Mumbai, India

March 2022 – March 2025

Bachelor of Commerce – 8.7/10

SKILLS

- **AI & Analytics** – AI Pipelines | Microsoft Copilot | Prompt Engineering | Python | R | SQL | BI Reporting
- **Business Tools** – Excel (Advanced) | PowerPoint | Word | Microsoft Office 365
- **Professional** – Translating Messy Data into Insight | Stakeholder Communication at All Levels | Commercial Awareness | Resilience
