EDUCATION

MSc Finance Analytics
King's College London, UK
Sep 2025 – Sep 2026

Modules: Econometrics, Statistical Modelling, Data Analytics, Big Data & Text Analytics, Financial Reporting

Dissertation: Built and backtested a systematic trading strategy in Python on large financial datasets

BCom (GPA 8.7/10)
Jai Hind College, Mumbai, India
Mar 2022 – Mar 2025

TECHNICAL SKILLS

Python – Pandas, NumPy, Matplotlib
SQL – querying, joins, validation
R – data cleaning & analysis
Excel – PivotTables & VLOOKUP
BI Dashboards & Data Visualisation
Bloomberg Terminal
Git | n8n | LangGraph

ANALYTICS TOOLKIT

Data Cleaning & Validation
Exploratory Data Analysis
Statistical Modelling & Inference
Experiment Design & A/B Testing
Customer Segmentation
Reporting & Process Automation
Stakeholder Communication

CERTIFICATIONS

DeepLearning.AI
Agentic AI Certificate

Forage Simulations
Goldman Sachs | Quantum

PROFESSIONAL PROFILE

MSc Finance Analytics graduate who turns large, messy datasets into decisions senior stakeholders act on. Strong across the full analytics cycle: cleaning and validation, exploratory analysis, statistical modelling and dashboard reporting in Python, SQL, R and Excel. Experienced leading teams and translating technical findings for non-technical audiences. Available immediately for data and business analyst roles.

EXPERIENCE

Student Consultant — Research Lead Jun 2026 – Jul 2026
Practera Finance Micro Internship, London, UK

- Analysed \$77B+ of financial data from multiple sources to identify investment trends, uncovering a critical insight that redirected the team's entire recommendation approach.
- Gathered, validated and reconciled data with an 8-person cross-functional team, ensuring quality and consistency across all deliverables.
- Presented evidence-based recommendations directly to the client's Managing Director, translating complex analysis into clear, actionable insight.
- Managed four concurrent workstreams to deadline, adapting the analytical approach mid-project when initial assumptions proved flawed.

Intern — Data & Systems Mar 2025 – Aug 2025
DG Software, Mumbai, India

- Improved data integrity by 30% across 12 database tables by redesigning the data architecture and embedding automated validation processes.
- Wrote SQL to query, extract, validate and reconcile datasets of 10,000+ records, improving retrieval efficiency by 25%.
- Built reporting dashboards and BI outputs used by senior management for operational decision-making, eliminating 8+ hours of weekly manual processing.

ANALYTICS PROJECTS

Team Leader — King's Investment Fund Mar 2026 – Jun 2026
Equity portfolio, UK & European markets

- Led an 8-member team; delivered +300 to +500 bps outperformance versus the FTSE 100 by applying CAPM and factor analysis to evaluate risk-adjusted returns.
- Built performance dashboards in Python and Excel and presented strategy recommendations to faculty advisors.

Quantium Data Analytics Simulation Aug 2026
Forage — retail sector

- Cleaned and analysed 264,000+ retail transaction records in R and Python, delivering customer segmentation, brand affinity analysis and experiment design in a client-ready report for non-technical stakeholders.

Agentic AI Workflow Automation Jun 2026 – Present
Personal project

- Built automated data pipelines in Python, n8n and LangGraph for retrieval, validation and structured report generation, cutting manual research from hours to minutes.

ADDITIONAL

- Goldman Sachs Operations Simulation (Forage), Aug 2026** — analysed trade settlement data across Trading, Compliance and Technology teams.
- 48-Hour Startup Challenge, King's College London, Nov 2025** — gathered insight from 40+ users under deadline and pitched to a panel of senior mentors.
