PROFESSIONAL PROFILE

MSc Finance Analytics graduate combining financial domain knowledge with hands-on analytics and applied AI. Strong across the analytics cycle — cleaning, validation, exploratory analysis, statistical modelling and dashboard reporting in Python, SQL, R and Excel — and in automating research and reporting workflows with agentic AI tooling. Comfortable presenting technical findings to senior, non-technical stakeholders. Seeking data analyst, AI and financial analytics roles in India.

EXPERIENCE

Student Consultant — Research Lead

Jun 2026 – Jul 2026

Practera Finance Micro Internship, London, UK

- Analysed \$77B+ of financial data from multiple sources to identify investment trends, uncovering an insight that redirected the team's entire recommendation approach.
- Validated and reconciled data with an 8-person cross-functional team, ensuring quality and consistency across all deliverables.
- Presented recommendations directly to the client's Managing Director, translating complex analysis into clear, actionable insight.
- Managed four concurrent workstreams to deadline, adapting the approach when initial assumptions proved flawed.

Intern — Data & Systems

Mar 2025 – Aug 2025

DG Software, Mumbai, India

- Improved data integrity by 30% across 12 database tables by redesigning the data architecture and automating validation.
- Wrote SQL to query, extract, validate and reconcile datasets of 10,000+ records, improving retrieval efficiency by 25%.
- Built reporting dashboards used by senior management for operational decisions, eliminating 8+ hours of weekly manual processing.

ANALYTICS, AI & FINANCE PROJECTS

Systematic Trading Strategy — MSc Dissertation

2026

King's College London

- Built and backtested a systematic trading strategy in Python on large historical market data, evaluating signal quality and risk-adjusted returns.

Agentic AI Workflow Automation

Jun 2026 – Present

Personal project

- Built automated pipelines in Python, n8n and LangGraph for retrieval, validation and report generation, cutting research from hours to minutes.

Team Leader — King's Investment Fund

Mar 2026 – Jun 2026

Equity portfolio, UK & European markets

- Led an 8-member team; delivered +300 to +500 bps outperformance versus the FTSE 100 by applying CAPM and factor analysis to evaluate risk-adjusted returns.
- Built performance dashboards in Python and Excel; presented strategy recommendations to faculty advisors.

Forage Virtual Experience Programmes

Aug 2026

Quantum — retail analytics | Goldman Sachs — investment banking operations

- Quantum:** cleaned and analysed 264,000+ retail transaction records in R and Python — customer segmentation, brand affinity and experiment design, delivered as a client-ready report.
- Goldman Sachs:** analysed trade settlement data across Trading, Compliance and Technology teams, documenting process controls.

EDUCATION

MSc Finance Analytics

Sep 2025 – Sep 2026

King's College London, United Kingdom

Modules: Econometrics, Statistical Modelling, Data Analytics, Big Data & Text Analytics, Financial Reporting

Bachelor of Commerce (B.Com.) — GPA 8.7/10

Mar 2022 – Mar 2025

Jai Hind College, University of Mumbai, India

TECHNICAL SKILLS & CERTIFICATIONS

Programming & Data	Python (Pandas, NumPy, Matplotlib), SQL (querying, joins, validation), R, Advanced Excel (PivotTables, VLOOKUP)
AI & Automation	Agentic AI workflows, LangGraph, n8n, LLM-assisted research automation, Git
Analytics & BI	Data cleaning & validation, exploratory analysis, statistical modelling & inference, A/B testing, customer segmentation, dashboard design & data visualisation, process automation
Finance	Bloomberg Terminal, portfolio & risk analysis (CAPM, factor models), equity research, financial reporting
Certifications	DeepLearning.AI — Agentic AI Certificate; Forage — Goldman Sachs Operations, Quantum Data Analytics
