MSc Finance Analytics graduate from King's College London with experience in quantitative analysis, financial research, SQL, and Python. Strong foundation in corporate finance, econometrics, financial reporting, and investment analysis through academic, consulting, and portfolio management projects. Experienced in analysing financial data, preparing client presentations, and collaborating across teams to deliver data-driven recommendations. Highly analytical, detail-oriented, and eager to contribute to investment banking advisory and transaction execution.

EDUCATION

Kings College London, London, UK

Sep 2025 – Sep 2026

MSc Finance Analytics

- Coursework in Corporate Finance, Financial Analytics, Statistical Modelling, Financial Reporting, Econometrics, and Risk Management

Jai Hind College, Mumbai, India

March 2022 – March 2025

Bachelor of Commerce – 8.7/10

- Grounding in financial accounting, auditing, and regulatory compliance

WORK EXPERIENCE

DG Software, Andheri, Mumbai, India

March 2025 – August 2025

Intern, Data and Systems

- Established and maintained a golden source of master data by restructuring 12 database tables, reducing data duplication by 30% and improving data integrity across entities
- Used SQL to query, extract, validate, and reconcile datasets containing over 10,000 records, identifying discrepancies and improving reporting accuracy
- Developed repeatable data validation processes, improving retrieval efficiency by 25% and supporting reliable business reporting
- Built reporting dashboards and management information outputs, communicating analytical insights to non-technical stakeholders
- Maintained documentation covering database structures, validation procedures, and process improvements

RELEVANT EXPERIENCE

Quantum Data Analytics Job Simulation (Forage)

August 2026

- Analyzed 264,000+ records in R and Python, performing data preparation, cleaning, and quality checks before conducting customer segmentation and experimentation analysis
- Identified data discrepancies and quality issues, resolving them methodically before analysis
- Produced data quality reporting and communicated findings clearly to a non-technical stakeholder

Goldman Sachs Operations Job Simulation (Forage)

August 2026

- Completed an Operations Analyst job simulation focused on trade settlements, asset transfers, and operational processes within an investment bank
- Analysed financial data to identify issues affecting trade settlements and client asset transfers
- Collaborated with Trading, Compliance, and Technology teams to resolve operational issues while considering regulatory requirements
- Applied operational risk management principles and developed an understanding of investment banking operations

Practera Finance Micro Internship Project, London, UK

June 2026 – July 2026

Student Consultant (Research Lead)

- Acted as a central point of contact for data requests, gathering, validating, and reconciling information from multiple internal and external sources
- Conducted quantitative analysis of INR 6.45 lakh crore (\$77B+) of financial data to identify investment trends and support strategic funding recommendations
- Collaborated across multiple teams to resolve analytical inconsistencies and develop evidence-based recommendations
- Produced executive reports and client presentation materials, presenting findings directly to the client's Managing Director

PROJECTS AND ACHIEVEMENTS

King's Investment Fund – Team Leader

March 2026 – June 2026

- Conducted company and industry research across UK-listed equities to support portfolio construction and investment decisions
- Applied CAPM and Fama-French factor models alongside quantitative analysis to evaluate portfolio performance and expected returns
- Analysed portfolio performance against the FTSE 100 benchmark, assessing risk-adjusted returns and sector allocation
- Prepared investment reports and client-style presentations communicating portfolio strategy and analytical findings
- Reconciled portfolio data from multiple financial sources, ensuring accuracy and consistency before presentation

Agentic AI Workflow Automation

June 2026 – Present

- Built automated workflows supporting financial data retrieval, validation, structured reporting, and investment research using multi-agent AI systems
- Completed the DeepLearning.AI Agentic AI Certificate covering multi-agent systems and automated tool use

SKILLS

- **Finance & Quantitative** – Financial Analysis | Quantitative Analysis | Investment Research | Corporate Finance | Portfolio Analysis | Company & Industry Research | Financial Reporting | Risk Analysis
- **Technical** – SQL (query, extract, validate, reconcile) | Python | R | Excel (Advanced) | Database Design & ER Modelling | Dashboards & Reporting | Bloomberg Terminal
